

ICS Cybersecurity Evaluation (401) Training

OPSEC Walkthrough

Identify Potential Security Risks.

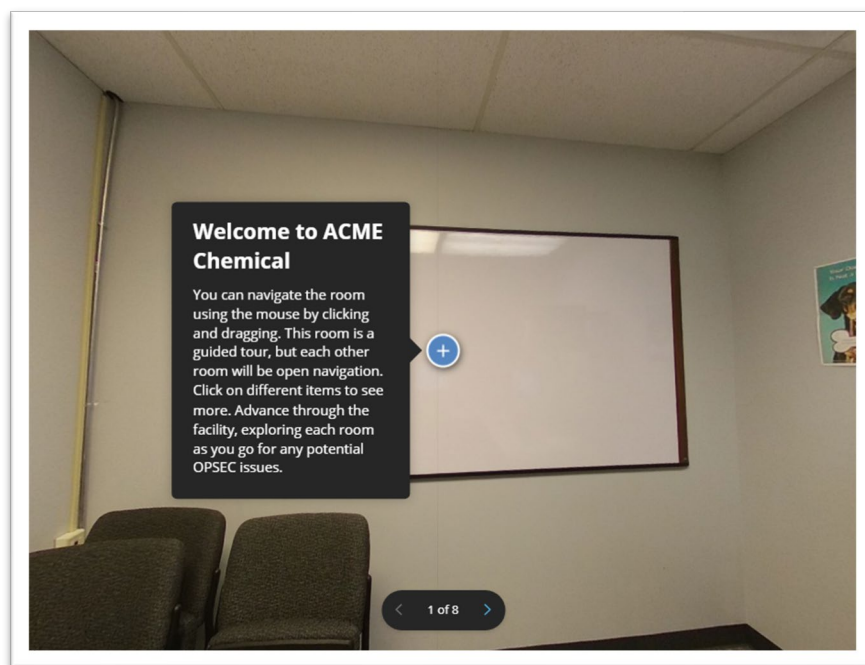

Time: 20 minutes

Resources: NetLab

**This does
NOT need to
be submitted
after
completion.**

Instructions

When you start this activity, you can navigate the scenario using your mouse or keyboard arrow keys. Hovering over certain items in a room with interactive items will display more detailed information. Make a list of the number of OPSEC concerns you see. Assume for the scenario that in each room everyone who works in the room is currently out of the room.

Begin the walkthrough by clicking on the link in the VLP to launch it in your browser. The opening screen should look like this. Make sure your browser allows for new tabs to be opened.

How many security issues did you identify?

What OPSEC issues did you notice in your walkthrough?
