Phishing Exercise

Create a Phishing Email.

Time: 30 minutes

Resources: Paper and Pen; Computer

**This does
NOT need to
be submitted
after
completion.**

Instructions

Part 1: Craft a Phishing Email

Work to craft a phishing email using the ACME specialty chemical leadership bios seen below.

Read through the bios and create an effective phishing email to send to the company.

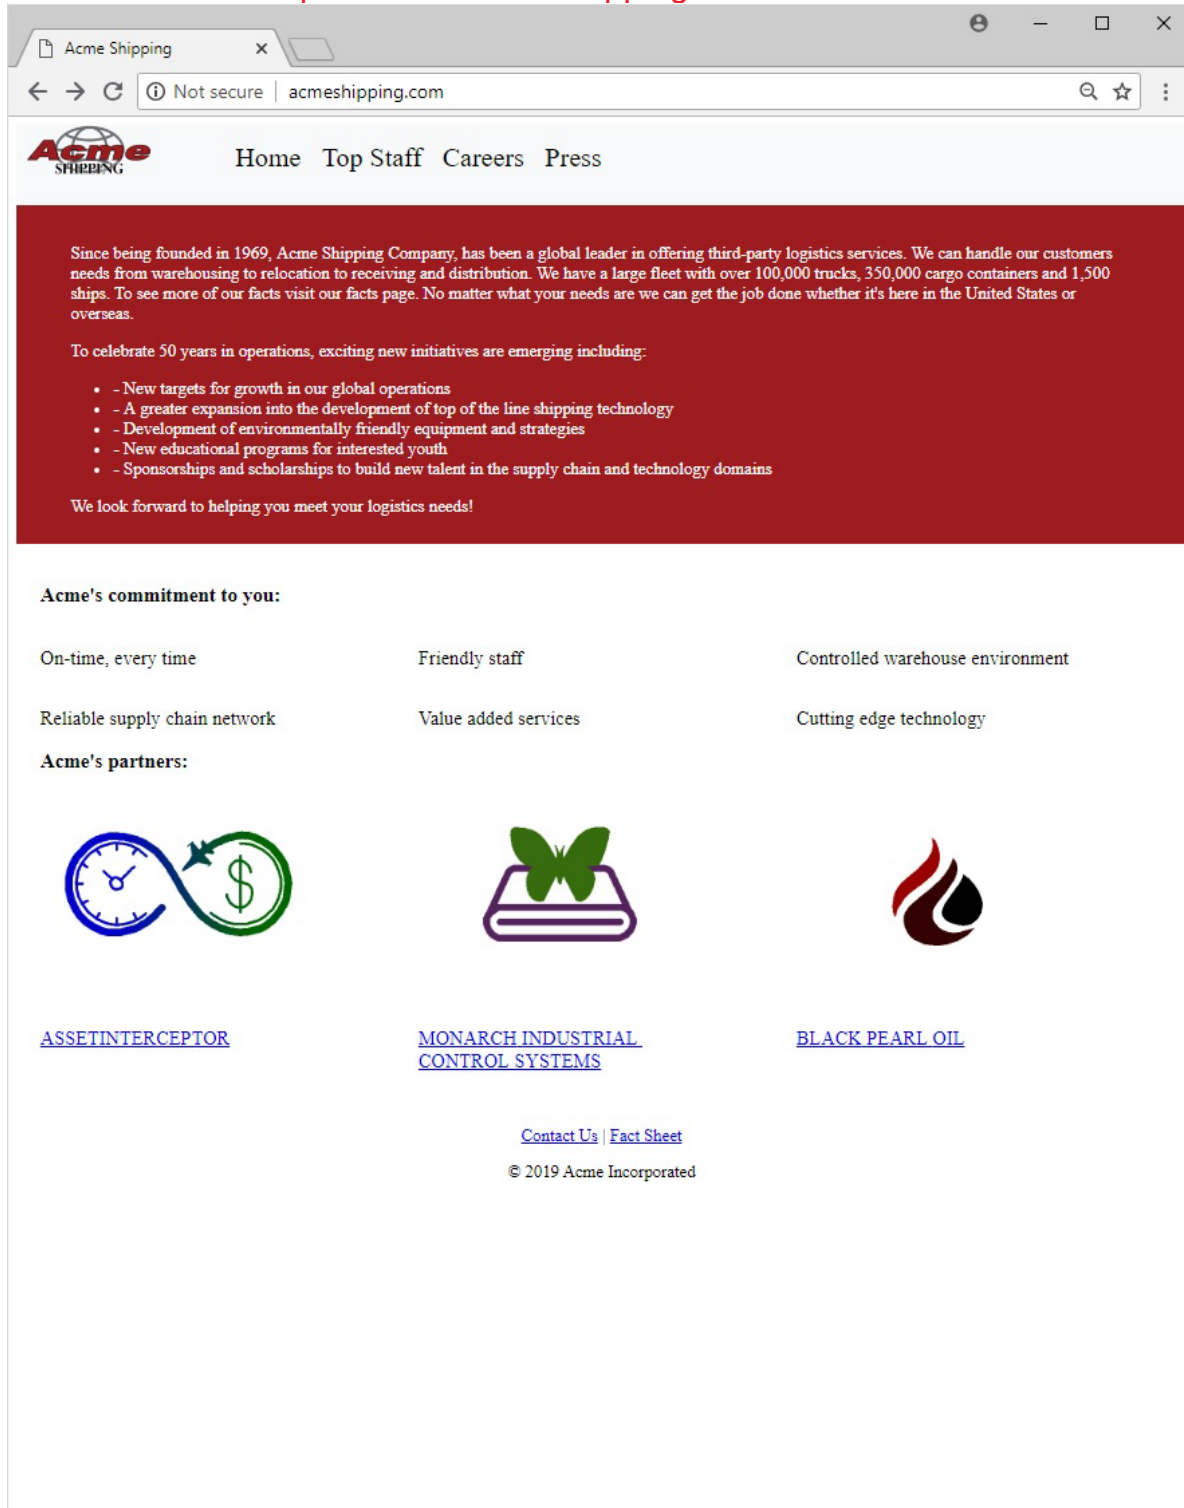

Criteria for a 'Good' Phishing Email

- ✓ Sense of urgency
- ✓ Appears to come from a trusted source
- ✓ Includes information regarding something the target is involved in or passionate about
- ✓ Grammar appropriate and NO misspellings!
- ✓ Less is more (simple can sometimes be more effective)

Elizabeth Swann

As a young girl she was fascinated by ships and the ocean. She decided at a young age that she would somehow work on the ocean, she just didn't know what that would look like. The first time she went sailing was when she was eight years old with her father Governor Swann. Elizabeth was born and raised in Portland, Oregon and her family often made trips to the beach to play.

When Elizabeth was 20 she decided to join the United States Navy where she was a commissioned officer. While in the Navy she spent time aboard the USS Dauntless as an asset/purchasing manager. She served her country for 20 years before retiring in 2018. When she retired, she joined our team here at Acme as our purchasing manager. She still gets to spend time aboard some of our ships as she goes out and verifies purchase orders that have been submitted.

While working for Acme Shipping is not the same life that Elizabeth got used to while serving in the Navy, she is grateful for the extra time she gets to spend at home with her son Henry and her husband Will, who also works for Acme Shipping. Will and Elizabeth met while she was serving in the Navy, working on a project in which Acme Shipping was contracted to do work for the Navy. Will was the lead engineer of the project while Elizabeth was responsible for purchasing supporting equipment.

Intro

I am the daughter of Governor Swann, born and raised in Portland, Oregon. I have always had a love of the ocean. Therefore, naturally I joined the Navy when I was 20 to help protect our homeland while spending time in a place that I fell most at home. I served for 20 years. While serving I met and married my best friend, Will Turner, in 2005 on the beach. In my spare time, I enjoy skiing, fishing, hiking, playing the guitar, and being with the love of my life and our little boy. We have a dog named Chopper, he is a white terrier mix.

Will Turner

As a young boy Will had a fascination with engineering works of art. His Dad would take him all over to see amazing pieces of engineering history, such as the Golden Gate Bridge, The Eiffel tower, The Hoover Dam, The Great Wall of China and The Great Pyramid of Giza. He knew that he would be some kind of engineer when he grew up, what he didn't expect was that he would be spending most of his career as an engineer at sea.

Will spends about two months at a time at sea working with the chief officers to ensure that the ship they are manning is in tip top shape. Will is responsible for addressing any issues found on the ships in a timely and cost effective manner. It doesn't matter if the issue is maintenance related or if it's a safety issue, Will ensures that all matters are taken care of. Will is extremely knowledgeable about how Acme Shipping ships systems all work. From the engine, to the cooling system, to the fuel system; Will is the guy that will know whether it is running correctly or not, and then how to fix it.

When Will is not at sea, he spends time at home with his wife Elizabeth, also an Acme Shipping employee, and his son Henry. Will met Elizabeth while working together on a Navy project where Acme Shipping was the contractor. Will served as the Chief Engineer and Elizabeth as the Purchasing Manager

Summary

I have been working at Acme Shipping since I was a young man. I started as a wiper, or in other words part of the cleaning crew aboard the ship. I have worked my way up through the ranks to become the Chief Engineer. I met my beautiful wife Elizabeth 15 years ago. She was in the Navy and Acme was contracted to help on a project that she was the purchasing manager for. I was assigned as the lead/chief engineer for that project. We married a year later and had a little boy a few years later. His name is Henry and he is now 10. I love my job and working for Acme, I'm sure I will retire here at which point my wife and I will probably enjoy time doing some casual sailing and lots of fishing. Currently, in my free time I enjoy playing video games with Henry and getting out and enjoying what nature has to offer.

Jack Sparrow

Jack has always been an adventure seeker, with a keen interest in the sea. He is not afraid of conflict and will handle any situation that arises with ease, as if it is natural for him. Jack struggled as a young kid because of his keen interest in seeking adventure. He would inevitable end up in some sort of battle with friends or at times foes but in the end his big heart would bring him out on top.

Once Jack graduated from High School he landed a job with us here at Acme Shipping where he has spent his whole career. He started out as a line worker and has worked his way through the company to become Chief Executive Officer. Jack spends about two months at a time out at sea, where he is constantly inspecting every aspect of the ship that he is on to ensure it is in perfect condition. Even if he sees a little bit of dirt on the deck he will stop and clean it up, he doesn't want a safety hazard on his ship. He works closely with the Chief Engineer to ensure that any problems he discovers are taken care of in a timely manner.

In his spare time Jack spends time on his yacht, the Gold Pearl, searching for sunken treasure and hanging out with friends. He has not found his true love yet and has no children, which is okay with him because it allows him the freedom to be adventurous.

Intro

I have always been known as a drifter, despite that I found a great company to work for and have spent the last 20 years working for them. I spend most of time sailing the seas to get cargo safely to its destination. When I'm not sailing I enjoy finding adventure with friends. I can often be found at the beach with a beer and a fishing pole. I hope that one day I can find someone to settle down with but for now I am enjoying the freedom to be as adventurous as I want without the worry of a family at home.

Carina Smyth

Carina has always been extremely fascinated with the stars, which led her to working in a company that spends so much time out at sea. The Ocean is the perfect place to observe the stars as their aren't many lights to obscure the stars. Star gazing is simply Carina's hobby, when she is working she can be found analyzing data from Acme. She doesn't have to spend much of her time at sea, but every once in a while she is asked to go out on a trip, at which point she gladly goes.

Acme Shipping is lucky to have Carina on their team, as she has provided them with invaluable data about how they could improve their processes. She has not only analyzed data regarding processes, but also regarding our Monarch Industrial Control Systems both hardware and software. She has enabled us to report problems to Monarch in a timely manner so they can resolve issues quickly, instead of having to wait for somebody else to report the troubles. She is extremely competent in pin pointing pain and problem areas in anything that she is asked to analyze.

Due to her fantastic work, Carina was resently promoted to Chief Information Officer. Well done Carina!

Carina grew up in Tallahassee, Florida where she lived with her Mom. While attending school she quickly realized that it wasn't just astronomy that she enjoyed, she also enjoyed math and science, which led her to become interested in Information Science. While working her way through college her Mom passed away and she began searching for her father. She is happy to report that she found him about a year ago and they are getting acquainted, it has been a great experience.

Summary

My passion is astronomy and the stars, which has led me to the ocean and data analysis. The ocean is the perfect place to observe the stars and astronomy has a lot to do with data. Since astronomy has so much to do with data, I decided to go to school to become a data scientist. I graduated with my Master's degree in data science from Columbia University in 2002. I have worked in various places over the years but have been with Acme for the last two years and I love it because it connects me to the stars while allowing me to earn a living. My Mom passed away while I was in college and I started looking for my father. I have recently found him and I actually discovered that my passion for the stars came from him. I am so glad I have you in my life now Hector Barbossa!

Phishing Exercise

Part 2: Evaluate Phishing Emails

Look through the Example Emails and evaluate them using the chart below. Which one is the most convincing? Which one is the least convincing? Remember the criteria for a good phishing email.

Criteria for a 'Good' Phishing Email

- ✓ Sense of urgency
- ✓ Appears to come from a trusted source
- ✓ Includes information regarding something the target is involved in or passionate about
- ✓ Grammar appropriate and NO misspellings!
- ✓ Less is more (simple can sometimes be more effective)

What Phishing Email Did You Like Best?

Use the table below to score the example phishing emails.

	Sense of Urgency	Appears to come from a trusted source	Includes information the target is involved in or passionate about	Appropriate grammar and NO misspellings	More is less (simple can sometimes be more effective)
Email #0 Topic: Swim team money	✓	✓	✓		✓
